

## Civil Bank Limited

Disclosure under BASEL II for the Third Quarter ended as at Asar End, 2068 of FY 2067/68

### (A) Tier 1 Capital and Its Breakdown:

Core Capital (Tier 1)	Amount in NPR
<b>Paid up Equity Share Capital</b>	1,200,000,000
<b>Un-audited current year cumulative profit</b>	6,640,538
<b>Less: Miscellaneous Expenditure not written off</b>	(5,085,780)
<b>Total Core Capital</b>	<b>1,201,554,758</b>

### (B) Tier 2 Capital and Its Breakdown:

Supplementary Capital (Tier 2)	Amount in NPR
<b>General loan loss provision</b>	31,551,590

### (C) Detail of Subordinated Term Debts:

There is no Subordinated Term Debts as of Fiscal Year End 2067/68.

(D) **Deductions from Capital:** Pre-Operating expenditure to the extent not written off NPR 5,085,780.00

### (E) Total Qualifying Capital:

Particulars	Amount in NPR
<b>Core Capital (Tier 1)</b>	<b>1,201,554,758</b>
<b>Supplementary Capital (Tier 2)</b>	31,551,590
<b>Total Qualifying Capital</b>	<b>1,233,106,347</b>

### (F) Capital Adequacy Ratio:

Particulars	Percentage of Total RWE
<b>Capital Adequacy Ratio – Core Capital</b>	20.73%
<b>Capital Adequacy Ratio – Capital Fund</b>	21.28%

### (G) Risk Weighted Exposures for Credit Risk, Market Risk and Operational Risk

Particulars	Amount in NPR
<b>RISK WEIGHTED EXPOSURES</b>	
<b>a Risk Weighted Exposure for Credit Risk</b>	3,924,177,422
<b>b Risk Weighted Exposure for Operational Risk</b>	1,849,160,679
<b>c Risk Weighted Exposure for Market Risk</b>	21,615,205
<b>Adjustments under Pillar II</b>	

Add : 3% of the Total RWE due to non-compliance to Disclosure (6.4 a 10)	-
Add : ....% of the total deposits due to insufficient Liquid Assets (6.4 a 6)	-
<b>Total Risk Weighted Exposures (After Bank's adjustments of Pillar II)</b>	<b>5,794,953,306</b>

**(H) Risk Weighted Exposure under each of 11 categories of Credit Risk**

<b>Held to Maturity</b>	258,842,220
<b>Available for Sale</b>	-
<b>Total Investments</b>	258,842,220

**(Q) Summary of Bank's Internal approach to assess Capital Adequacy to support current and future activities:**

The overall strategy of the Bank has been formulated with special consideration to the capital adequacy requirement as governed by BASEL II. The present Paid Up Capital of the Bank is NPR 1,200.00 Million and after the Initial Public Offering of equity shares of NPR 800.00 Million, the Paid Up Capital shall become NPR 2,000.00 Million, which shall further enhance the capacity of the Bank to undertake risk. The Bank has adopted the following strategy for managing, minimizing and mitigating its risk exposure under the following three categories:

**Credit Risk:**

Bank's Management is responsible for understanding the nature and level of risk taken by the Bank and relating the same with the Capital Adequacy level. The Country Risk Department which monitors the Credit Risk through review of the Credit proposals, analyzes the trends, assesses the exposure impact on capital, credit concentration risk, single obligor exposure risk, other credit related risks and prepares reports of such pertinent credit related risk reports for further submission to the Management.

**Operational Risk:**

From its inception, Civil Bank Limited has implemented sound practices and policies for assessment, minimization and mitigation of the Operational Risks in its day to day operation. In its short span of operation, the Bank has successfully achieved a very sound level of Operational Risk Management and Control in its banking activities.

Since the beginning and over a short period of its operation, the Bank has adopted following strategies in its endeavor to create effective system of operational management and its impact on Capital Adequacy of the Bank:

- a) Zero tolerance compliance policy of the Bank to the suggestions and shortcomings as observed by officials from Nepal Rastra Bank and Auditors through audit and inspection.
- b) Up to date Operation Manuals and implementation of the same in Bank of Credit, BASEL II Disclosure, Business Desk, Cash Operation, SWIFT, Letter of Credit, Clearing, Manager's Cheque, Reconciliation, Safe Deposit Locker, Trade Finance operation.
- c) In house periodic Internal Audit by a qualified Chartered Accountant as Internal Auditor.

- d) Centralized Approval and Control Mechanism of Information Technology, Human Resource Management, General Services, Procurement, SWIFT, Trade Finance, Finance and Treasury Operations, Reporting, Credit Control and risk management, Credit Administration, Remittance.
- e) Regular training and orientation of staffs of the Bank on various operational processes and procedures.
- f) Periodic visit and assessment of operational activity of various departments by members from Executive Management of the Bank.
- g) Implementation of the widely accepted Core Banking Solution Software Temenos 24 in its operation.

**Market Risk:**

In order to effectively manage the market risk the bank has set up the three tiered treasury department structure viz:

- a) Treasury Front Office
- b) Mid office
- c) Back office.

Treasury front office is entrusted with the functions of market watch, research (both fundamental and technical) and analysis. Front office takes decisions as regards to investments and trading as per approved policy/guidelines and within the perimeters of NRB regulations

Whereas Treasury Mid office (which is independent from Front Office) monitors the counter party credit risks and also enforces the approved trading and day light/overnight open position limits as per the approved policies.

Treasury back office is entrusted with the function of settlement and delivery of all the deals which are executed by front office dealers as per the approved policies/regulations.

**Mechanism to manage Foreign Exchange Risk:**

Treasury front office is the sole custodian of consolidated net open position of all the foreign currencies on which the bank is allowed to deal in. Quoting of all spot/forward rates are done only by the treasury dealers. All the branches/units dealing in foreign currency have to obtain quote from Treasury before they enter into buy/sell deals and after the deal they have to report their transactions as soon as possible to Treasury. This helps front office to monitor the net open position on real time basis and allowing the dealer to take proper timely action on managing the open position risks.

**Mechanism to manage Liquidity and Interest rate risks:**

In order to monitor the liquidity and interest rate risks the bank is following the GAP analysis procedures.

With regard to Market Risk, the Treasury Department maintains Net Open Position of all the currencies on daily basis, reviews and analyzes the trends, and assesses the exposure impact on capital. The Net Open Position is also discussed in ALCO (Assets Liability Committee) meeting held every week.
